### Key

+ Points HC Improvement

- Points HC Reduction

0 Points - Maintain HC

-1 Missed a month

-2 Missed 2nd month

### What this means!

Each month your score is checked against Archery Handicap tables to give you a Handicap (HC) just like golf.

Championship Handicap Points (CHP) are gained by shooting above your own HC based on the previous months results while points are lost from shooting below the previous HC.

A zero result means that you are maintaining a steady HC.

Missing a month drops you -1, missing a 2nd month -2 (so -3 for the SIDAA Championship as a minimum of 3 months must be shot).

Therefore a positive result shows improvement over time, with a negative score, has a must do better on your school report card.

The average archers CHP will be between -5 and +5 over a season.
